General Comment

I do not believe AI holds a place in the future of the US. I believe it is nothing more than a gimmick, a parlor trick. It seems neat for a moment to some people but they have no idea it steals from the livelihoods of others and has a negative impact on the world. It has a limited shelf life and will be forgotten about but the damage will already be done. AI will be the downfall of many companies that chase the latest toy while stepping on the backs of artists trying to make a living. Do not throw away the laws we have just for something that will burst. Do not drown the world with AI. Please do what's right
