Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4760

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eric Pugh

Email: [REDACTED]

General Comment

A.I. should never, ever take away the work of human beings! It shouldn't be allowed to! Not in a million years, not for any reason! Whether it's drawing, animating, writing, voice acting, filming, effects editing, sound designing or video game coding, be they amateur projects that took a few hours or professional level pieces of art that had days, weeks, months or even years spent on them, those belong to the creatives who dedicated their lives to practicing their crafts and constructing a variety of artistic expressions, and the creatives should have the right to report theft!

A.I. is a cheap, unreliable shortcut that produces ugly and dysfunctional results which can never truly match what the most capable of human hands and minds are able to make! It has no business infringing copyrights on products of legit effort!

A.I. stealing what it wants without consequence and claiming work for itself will only lead to the certain demise of art, entertainment and creativity as we know it!

A.I. should only exist as a tool for the absolute most menial of tasks people can also easily do, not to take over the mediums of media or threaten the employment of trained, real-life individuals!
