General Comment

Artificial Intelligence is an oxymoron. OpenAI is a theft company and they made a theft machine that puts people out of work, does a bad job at forming text and images without knowing context, and spreads misinformation. I do not want this and many will agree with me, especially those who are already losing their jobs because these things can do a worse job cheaper FOR NOW. AI generative models will make it more expensive to access after mass adoption so they can ruin the economy and send us into a new economic depression. I do not want this agency to be open, and I do not want the government to be partnering with private companies that ruin the nation. Please.
