Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4797

Comment on FR Doc # 2025-02305

Submitter Information

Name: Marina
Sanchez

General Comment

While I acknowledge that artificial intelligence comes in many forms that can be beneficial, I also acknowledge that unregulated AI can be both dangerous and unnecessary.

Our current government claims they want to make more jobs for the American people. If that is truly the goal, why would you support the systems that seek to fully replace hardworking, everyday Americans? As an illustrator in the entertainment art industry, I have worked hard for YEARS to develop my skills. I am tired of my work, photos, and my personal information being viewed as "fair use" by OpenAI.

AI needs regulations in order to keep it limited to being used as a tool - not being used as a human replacement. Jobs need protection - I have witnessed far too many peers lose their jobs due to corporate greed involving AI.

There is no reason OpenAI needs immunity from state copyright laws. I view it as an excuse to continue stealing data and avoid compensating creatives, all under the guise of national security. By allowing OpenAI to avoid regulations, you truthfully threaten the security and rights of the American people.

Allow us the right to give our own consent; no one should be automatically "opted in" to training systems.

I am not anti-tech nor anti-AI. However, I do not support unregulated AI training, whether it be for creative reasons or otherwise.

Thank you for your time.
