General Comment

AI is a total shame and shouldn't be a focal point of American businesses or government. It steals the work from others ruining their industries all so it can output some nonsense that is usually incorrect. AI is also a massive energy consumer. We can't meet green energy goals and power AI. The guardrails or regulations this request speaks of are necessary and should be stricter so AI machines can't profit off others without proper compensation. AI is outright wrong and should not receive special privileges.
