General Comment

I have already watched multiple friends and coworkers lose their employment due to generative AI tools and its misuse as shortcuts to avoid staff retention. Furthermore, myself and other friends of mine who survived these rounds of layoffs are forced to use AI in ways that does not make sense for their workflow or company culture. This has had a net negative impact on their productivity and morale. Everyone I know misses their former coworkers, company culture, and feels burdened with extra busywork that masquerades as skill and expertise but offers none. AI is not unleashing the power of the market, it is smothering it in confusion and pretense. Using the Federal Government to prop up the AI bubble only ensures that the inevitable burst will hurt more and last longer than if we let AI die its own natural death due to public backlash and broken promises. AI should be reigned in, not propped up
