

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-y3bj-byia
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4804

Comment on FR Doc # 2025-02305

Submitter Information

Name: Parker Balzarini

[REDACTED]

General Comment

AI is a speculative market similar to cryptocurrency and NFTs, with false promises to fool the public and huge legal problems by enabling them. It is stealing from the livelihood of Americans, and should under no circumstances be encouraged to do so even more easily by making it immune to the regulations that it already heartily ignores.

AI needs to be more controlled, not less so. Investing in it is a mistake that will set America back further. Nothing can replace the innovation of a human mind, and relying on AI to do so is relying on ideas that already exist, not new ones. AI cannot, and will never, further our understanding of a single subject. All it will ever be able to do is more efficiently draw incorrect conclusions that will have to be reviewed by someone that could have just done the work itself. "AI" does not think. "AI" is a buzzword that continues to fool the American public. "AI" is theft.

Nvidia's \$600B market cap drop was not an accident, AI is a speculative bubble waiting to pop. (It's like Nortel!)
