General Comment

I'm a professional artist. I have been for the better part of two decades. Most of my friends are also in the art field. Absolutely zero of us support the use of generative AI in all of its forms.

Generative AI is part of an insidious culture that's reared its ugly head and attacked my friends and myself directly through theft of personal copywritten work, through theft of jobs, and theft of income. Generative AI will selfishly destroy not only the artists it steals from, but the humanity within art itself.

Art IS humanity. Artificial Intelligence is NOT.

By allowing generative AI to freely steal and mindlessly regurgitate art you are actively supporting the destruction of human culture, as well as the disintegration of law.

Complex creativity is what separates us from other animals on this planet, so complex creativity needs to be protected.
