Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4845

Comment on FR Doc # 2025-02305

Submitter Information

Name: C H

General Comment

Generative A.I., and the way that billionaire investors have sold it to our government, is a scam. It is, at its core, nothing more than an advanced plagiarism machine, stealing the work of other human beings and regurgitating it en masse. To allow it to train freely on all of the creative material publicly available is not only a clear violation of U.S. copyright law, it is a violation of the dignity of all Americans who create and share art. At a time when tech oligarchs like Zuckerberg and Altman are extracting ever more from hardworking Americans, while lobbying our government to do less for us in return, they now seek to rob Americans of the very art they produce to escape that reality. To hell with them. Not only should the U.S. government block any requests from big tech to grant them unchecked authority to steal our intellectual property for their plagiarism machines, they should actively regulate the industry and establish, in law and in regulation, that training LLMs on copyrighted material is no different than plagiarizing that material outright. If Open A.I. wants to use our art, our writing, they can do what any other party would have to — ask us, and then pay us.

F&^% Altman, f&^% open A.I., and f&^% the oligarchs who want to steal our art for their profit. They've already stolen everything else; don't let them steal this to.
