General Comment

This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution. This document was also sent to [REDACTED] but I am also sending it here in case it was sent incorrectly.

As an artist whose work is stolen in the algorithm of generative ai, and as a former teacher, believe that ai should not hold any place in the united states. At best, it is just an overhyped bubble waiting to be popped, but at its worst, AI steals from my livelihood as an American, profits off of theft, and encourages laziness. Many students squander their education, choosing to make chat gpt do their work for them. In the way that it is currently being used and developed, it does more harm than good to the intelligence of the American people. Please, for the good of America and its people, do not allow AI to continue in its current form unregulated.

- Cody Canedy
