General Comment

If AI companies are allowed to just take material from artists without any restrictions or consequences, the effects to creatives both individually and collectively will be devastating. I urge those in power to vote against this clear abuse of artists talents and work!

The most impactful and important works of art and culture come from the mind and hand of living breathing artists. Generative AI can only copy heartlessly. To even call these programs "intelligent" is wildly misleading as they are simply software programs designed to "guess" properly. For the sake of not just working artists but for the greater whole of our cultural experience, I strongly oppose GenAI corporations the ability to take intellectual property to merely copy it without any legal obligation to the original creator or owners.
