General Comment

As a working American, I worry about big tech abusing AI to cut jobs from Americans who are already struggling to find and keep work. AI should not be allowed to be used in professions in which a human can safely do the work. We have already seen the damage AI has done last year, when 14% of lay offs was related to AI. I have been affected by AI in my work place as I now need government aid just to be able to make it by. I want to be able to support myself and big tech and corporations abusing AI have made it far harder. Please do not allow AI to lead to an unemployment crisis.
