General Comment

AI is blatant theft and if it keeps being pushed and supported it will cause even more misinformation everywhere on the internet, it will destroy the environment, it will destroy jobs for artists and writers, and it will make media you enjoy worse as machines spit out 'content' with no thought or creativity instead of real people taking time to craft art. Automation should be used for things that humans don't like doing or can't do safely, not things that humans enjoy and are uniquely capable of doing.
