General Comment

AI would be immensely detrimental for any American who creates. This is why I oppose it and this action plan.

Generative AI scrapes through sources and peels ideas from them to make its creations, and the sources it scours are privately owned. With every AI generated image, it steals material from many American-made works of art, thereby depriving Americans the compensation they rightly deserve. Any human who did this would be charged with theft many times over and be sent to prison.

AI profits off of lazy theft. Instead of hard-working Americans getting paid for their work, they would get their livelihoods ruined while a machine spews some creation out for its rich owner. This is plainly un-American and it should not be considered.

This is why I oppose this action plan and urge those in charge to reconsider.
