General Comment

DO NOT allow OpenAI or ANY OTHER company touting AI learning the ability to steal from hardworking HUMAN creators. No entity should have the power to ignore copyright or trademark to freely steal from any American, or any other human being the world over. GenAI is a wasteful, destructive, invasive, and above all UNWANTED industry. It regularly makes headlines about how little, if any, benefit or profit it creates for companies that institute it. It steals jobs from real people to replace them with a computer that is INCAPABLE of actually thinking or judging its own output. It's a privacy and security nightmare. How long until these companies scrape national secrets from someone's computer simply because these AI companies, and the companies who utilize AI learning models, make it impossible to actually remove or disable from our machines.

It steals from people, it steals their jobs, it violates our privacy, it violates our properties. It requires enormous amounts of energy that many grids can't even handle. It replaces trusted systems and services with a DEEPLY inferior or even outright dangerous imitations (think of the instances of genAI creating fictitious court cases, or AI google searches giving instructions on creating chlorine gas). GenAI and the companies that push it as "the future" have yet to prove that their product has any real value, and giving them untethered access to ALL of our data, is such an incredibly bad idea that there shouldn't even BE a question about it. SAY NO TO GENAI COMPANIES. THEY CAN NOT HAVE MY WORK. THEY CAN NOT AND WILL NOT STEAL, REPLICATE, OR REPLACE THE TALENT AND KNOWLEDGE OF MYSELF, MY FELLOW AMERICANS, OR THE REST OF HUMANITY.

NO TO GENAI
