General Comment

“This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.”

There is no "private sector innovation" in such AI without the theft of copyrighted works that has fed the ability to "create" in an artist-like manner.

This is contrary to the individual spirit needed for true innovation.

The information is stolen and it is outrageous that this industry is built on such blatant theft.
