General Comment

* I do not believe AI holds a place in the future of the US. It is a speculative solution to real problems that should be left up to people, not machines scraping content everywhere and anywhere, including from unverified and potentially damaging sources.

* AI steals from my livelihood as an American and profits off of theft. The only thing AI has currently been used for in the tech sector is an unrestricted bid to remove jobs and profit off the back of work created by others.

* AI is overhyped and is fleecing the eyes of the American public.
