General Comment

Computers cannot be held responsible for their decisions. How is this in any way, shape, or form, going to make America "better"? We the people fail to see any logical progress this would give us. You are only serving the betterment of yourselves, not the American people, by attempting to give AI which has been thoroughly proved time and time again to give, at best, inaccurate information, scraped from aggregate data and conversations amidst the internet, and at worst, harmful and legitimately deadly "information." Do not do this. We are begging you.
