## General Comment

The US government does not and should never have the right to freely steal from its people for any purpose. This is the death of the concept of ownership for nothing. "AI" is not intelligent and it can never become intelligent because it can only ever tell you what it thinks you want to hear. Open AI is a cancer on the entire world and must not be given these abhorrent permissions under any circumstances, and anyone suggesting they should is a crook and a grifter
