Email: [REDACTED]

General Comment

It is not burdensome to limit AI to materials not within copyright-- it is the purpose of copyright to prevent unwanted reproduction and dissemination of copyrighted material. This idea that AI is entitled to all material regardless of copyright completely flies in the face of every business and intellectual property interest that America has built over its long history. From Mickey Mouse to Superman, America's pop culture industry is a major economic concern that needs protection, and allowing a few tech corporations to freely copy and "train" their LLMs and other models on these valuable American assets, eliminating their exclusivity and making their copyright status moot, will only hurt our economy.
