

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-ybna-darz
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4944

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

AI has no place in the future of America or it's people. AI steals from my livelihood as an American and profits off of theft. Any infringement upon the American people's copyrights is unpatriotic. AI is over-hyped and is fleecing the eyes of the American public and contributing to energy waste.

What makes us American is the freedom to create what we want with our own ways, not relying upon AI. AI must compensate people for copyrighted training data, and AI-generated materials must not be copyrightable. Furthermore, there need to be laws limiting human "replacement" with AI, when that involves just expecting the remaining humans to go overtime on cleaning up the slop produced. the current methods of obtaining training data are immoral, if not downright illegal, due to legal precedent set in the past. The ecological impact of training AI as it currently stands consumes ridiculous amounts of energy and, in many cases, precious freshwater resources to cool these training centers.
