General Comment

Hi,

Protecting AI from being liable is throwing copyright law in the trash. Have you told Disney their intellectual property is up for grabs? I think they and their legal department would have a lot to say about OpenAI randomly generating an anthropomorphized black mouse in red short pants and calling it innovation.

The simple fact is OpenAI feeds off the hard work of living breathing artists who cannot make a living in creative fields. It seeks to replace them which will in turn assure OpenAI has no dataset to learn from. It is a self-defeating proposition. If OpenAI can recreate copyrighted and trademarked wit impunity, writers and artists simply won't share their art anymore, assuming they can afford to make any.

This move would be a costly mistake.
