

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-ybrq-wt7u
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4951

Comment on FR Doc # 2025-02305

Submitter Information

Name: Tristan Goodsell

Email: [REDACTED]

General Comment

I don't believe AI has a place in the future of America. The main function of AI is to collect information, shred it apart, and regurgitate it in a lesser or worse form with little regards to factual information, or who owns the original works that was put into the algorithms.

AI by how its designed can't have an original thought, its can't come up with new ideas, and it can't see the weaknesses in its own functions. Only human thought and knowledge can do these things. And shoving them all in a learning machine, just for it to spit out lackluster, flawed ideas or projects, does a disservice to every American it learns off of.

There's no amount of time or money you can put into AI for it to be better than the human ability of thought and reason

And this is putting aside that a lot of AI up to this point has had a lot if its data be used without creators' permission. Which is theft no matter which way you cut it.
