General Comment

Stripping copyright protections from everyday Americans who rely on their writing and art to make a living is an appalling prospect that enriches Silicon Valley tech billionaires at the expense of working people and families. OpenAI and other tech companies have offered no compelling explanation as to why this is necessary for "national security"; I strongly believe they claim it is so that they won't have to pay for data to train on. AI's unsustainable business model is not America's problem to solve. I oppose giving AI a copyright exemption in the strongest possible terms.
