General Comment

AI may have its purposes but it should not and cannot be allowed to just outright steal the materials used to train it. Not only do people and businesses work hard to produce actual work that AI simply copies without understanding it or it's meaning, but it also causes monetary harm and harm to the development of AI as well. If private businesses are not paying to use work to train AI, they are not encouraging anyone to produce anything to train the AI. An AI trained only on AI generated materials can only produce worse and worse material forever, more slop without any sort of actual benefit.
