General Comment

I am a digital artist. I've been drawing since I was 5 years old. I'm almost 35 now and I am passionate about drawing. It brings me joy that I can create a piece of art that makes others happy. I do not want to lose that feeling and passion but hearing that this bill even exists is appalling and an insult to artists everywhere. We do not want our work plagiarized by human or machine. Companies should not be able to use our artwork for AI training. It makes me feel like the companies are too cheap to afford artists and have to rely on machine made imagery which makes me feel that their end result is unreliable and a bad product. Computers cannot think of anything new. They have to rely on input from something else to be able to create and that would mean art, audio and text would have to be used, and those things have to come from somewhere, another person's creation. As an artist, I want to create things myself and not have to rely on a machine to do everything like how people relied on computers in WALL-E. We do not need AI to create. We have creative people out there who make so many wonderful things out there to show to the world that we love what we do. We do not need AI for that because the feeling of joy when creating cannot be replicated by computers. I do not wish for this bill to be passed and artists everywhere, as well as my self, want this veto'd
