General Comment

Hello,

I am an American artist.

Any AI technology that requires the bypassing of copyright protection to function is stealing from the livelihood of hard working Americans such as myself.

The claim that AI technology requires stolen content to grow suggests that said AI technology is not sustainable long term. It suggests that it is an overhyped, over-valued technology that will collapse when it no longer has a continued supply of stolen human-made content.

Copyright protections should not be softened for any AI technology company. Doing so would hurt American workers, creators, and culture for a technology sector that has yet to prove itself to be profitable, useful, and sustainable.
