

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-yenk-32hv
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5007

Comment on FR Doc # 2025-02305

Submitter Information

Name: Brooke Magill

[REDACTED]

General Comment

STOP LETTING AI STEAL FROM HARDWORKING PROFESSIONALS ! It is deeply unethical to allow ai to use anything but what the company themselves produced or licensed personally with the artist / writer / professional for training. Ai companies owe members of the creative industry untold amounts in damages for what they've already taken. Any company that scraped a single piece of work without express permission has committed theft, and should well be penalized for it, and since these companies have done this to thousands of people their software should be considered ineligible for commercial use. If you're unwilling to side with human professionals in this issue rather than big corporations, you owe it to independent creatives and everyone else who have had their hard work stolen and fed into a machine for profit to resign. Humanity should not be forced to compete with the robot software that steals people's work for jobs in any sector. AI poses a serious threat to creative expression, academics, and critical thinking, and should not be allowed to continue developing and being sold in the current manner on the basis of ethics. It is not in the public interest to continue such ai developments, nor is it in the public interest for the government to do anything else but enact strict regulations and end the use of ai in roles that should be human only, such as job recruiting. Failure to do this will be remembered for generations and will not be forgiven.
