General Comment

AI is currently synonymous with copyright violation and IP theft. It should be illegal to train an AI on copyrighted material, which includes most material publicly available online. AI scrapers do not ask permission from copyright holders before using their data. This is a legal nightmare in progress for all artists, musicians, writers, engineers, publishers, editors, directors, and other creators. The negative effects on most industries are already being felt and will continue to get worse until existing legal boundaries are enforced.
