Name: Logan MacLennan

[REDACTED]

General Comment

No, Open AI should not be able to freely access copyrighted work, due to defying the very point of a copyright. Copyrights serve as a safeguard to ensure their material is protected from other businesses, and forces media to expand in new directions. If Open AI wants to use training data, they MUST use open source data or make their own data to rely off of. Open AI cannot have or gain the right to access and/or violate copyrighted data.
