General Comment

Let me put this plain and simple:

If your product requires the THEFT of copyrighted material, out died not deserve to succeed.

Real people have spent their entire careers producing art, music, articles, and more, and their property should be protected.

If a regular person were to steal all that work and start making copies or amalgamations of it, they'd be fined or put in jail.

I don't give a damn what a company or even our government wants to do with AI. If you can't legally and ethically source your data,
YOUR PRODUCT DO NOT DESERVE TO EXIST.
