General Comment

Generative AI does not hold a place in the future of the US, and is a speculative market similar to cryptocurrency and NFTs. It only has false promises to fool the public and would lead to many legal problems if they are enabled. Generative AI also steals from the livelihoods of Americans and profits off of theft. It is overhyped, and fleecing the eyes of the American public. Ai is just a speculative bubble waiting to pop like Nortel. NVIDIA's \$600B market cap drop was NOT an accident.
