General Comment

Do Not Allow This!!! AI steals from the livelihoods and passions of americans and profits entirely off of theft. Allowing OpenAI to have immunity will show everyone that not only do you not care for the passions and work of people, but that you do not care for the people themselves.

On top of this, it is likely every other AI company will follow suit and the quality of everything that follows will decrease. Artists and Writers are what sells everything you want to be sold, they create what you want to sell, and they are responsible for maintaining the quality America so proudly boasts.

Allowing OpenAI complete freedom from consequences via lawsuits regarding copywrite infringement is an immensely slippery slope to not only reducing the quality of everything, but to attacking and disbanding the livelihoods of many, many people. Not only does AI like this have a place in our future, its presence now fully assaults the well being of our future.
