Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5062

Comment on FR Doc # 2025-02305

Submitter Information

Name: Ace Cody

[REDACTED]

General Comment

Understand that the use of artificial intelligence is NOT the same as human works or creative works. Just because I put the "Mona Lisa" into an art prompt and it gives me an A.I. version of the same work does not make it the same "Mona Lisa" as originally created.

In the same way we have limits and restrictions on fair use, I feel it's only right to acknowledge and emphasize that fair use for creatives and those who make their own content should be honored.

By allowing any A.I. work based on the works of others, while altering is not directly fair use and in fact is extremely insulting and degrading to those who do create. It is also not honoring the fair use standard for those who make their own statements, art, filmography, etcetera.

One example is a presidential speech. If you allow A.I. to be deemed by itself fair use, the public may then alter, twist and reproduce the speech, altering it's words and messaging for millions to hear and it would go unquestioned due to it being 'fair use' even if the clips and video of the speech and even many phrases and words are the same.

We cannot allow computers to replace human craft. It's inhumane and more over inhuman.

Thank you for your time.
