

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-yhfm-tejd
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5064

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

Historically, US copyright holders have fought tooth and nail to protect their Intellectual Property, from big corporations to independent artists. If OpenAI and other AI developers wants to train their models with copyrighted content, as they have often requested in their manifestos, then do the same thing that every person needs to do to use those: pay the licenses.

If your business model cannot exist without breaking the law, it is not a business model that makes it worth it. I may not enjoy or agree with the current use of generative AI, but for a government point of view, an AI trained on media that requires copyright doesn't make sense. AI usage should be reserved for data analysis, medical development, scientific research, given the infrastructure cost and enviromental damage, not generating images that mock human creativity.

Invest in the humans that create. A nation doesn't exist on money alone, it has a need for culture.
