General Comment

AI SUCKS!! It is actually starting to create convincing pictures for ads, books and animations. It also can write flawless 50 page essays in minutes. Except they aren't flawless. AI doesn't bother to check if the information it got from scanning the web is true or not. If someone made a joke post about George Washington saying he had 52 wives, and that was the first thing AI found when looking for facts about George Washington for Timmy's college essay, it's gonna put that in. Timmy is screwed. Also, some people who animate/draw for their jobs are getting laid off by the hour because "AI can make it faster" or "AI is more reliable." As a person who makes art I can confirm that it sucks to see AI making better art than you can. The only question is, is it actually better. ...?

No. That's the whole reason I wrote this. You, as a person, can create, write, and imagine AS. A. PERSON. AI will never be able to do that.
