General Comment

Generative AI is, in a word, theft. Generative AI studies and examines real artists' work and then copies it into a database where it will use the digital information to create a plethora of false images.

This not only allows people using this AI to steal the art styles and hard work of real artists but also can allow them to lie and manipulate people into believing false images to be real. The dozens and dozens of times I have seen people misunderstand a Generated image as real photography is terrifying and upsetting.
