General Comment

AI art has been nothing but a waste of time and money. it has added nothing to any of my experiences whenever its been added into a system. Worse still it is ruining the lively hood of countless citizens. Let me be blunt: if you have to steal to make your business work then you shouldn't be in business. giving a failing business model free reign to keep stealing is just a absolutely stupid idea and that money could be used on literally anything else. furthermore id be motivated to make sure to never vote for anyone that supported to give AI tech company's more money. they failed to deliver anything that could be considered more then a novelty or a cheap toy. those cheap toys at least don't suck up rivers and stupid amounts of power unlike AI which takes and takes and gives barely anything of worth that a human could do just fine.

if you support ai your lazy or stupid or both. stop wasting your time with this garbage it had its chance and it has failed to deliver even remotely on the future it was promising. stop f&^% over your own people for a baubble that as it is is happy to tell people eating glue isfine for you. its stupid and the people that are making it are stupid.

Artists deserve to keep their ability to protect their art. making art has been part of the human experience from the get go. by giving it over to machines with no ability to understand art you are saying that vast parts of the human experience don't matter. and that is bull&^%. id rather my tax dollars go to things that matter like infrastructure and trying to fix stuff not some glorified chat bot.
