General Comment

Why should Open AI corporations not be subjected to long-established copyright laws that protect artists, writers and creatives from having their work stolen?

The reason is money, of course. These corporations want to take money from the pockets of already struggling, hard working artists and add it to their pile of senseless wealth.

This is unacceptable. There is no place for unfettered generative AI in civilised society.

Open AI openly scorns human intelligence and talent and aims to squash it in favour of regurgitated, nonsensical slop that consumes more electricity than Saudi Arabia <<https://news.mit.edu/2025/explained-generative-ai-environmental-impact-0117>>

Open AI absolutely should be held accountable to copyright laws, as this is the very reason these laws were created.

Allowing these technologies to consume human artwork ceaselessly and without constraints would be a devastating blow to the Arts industry.
