General Comment

I am writing to discourage the changing of copyright laws to allow AI companies to mine the work of any creators. AI is only able to produce content by taking the writing, music, or art produced by real people and then chewing it up, rearranging it and spitting out something seen as new. This is already beginning to discourage people from sharing their work. Companies who generate this AI content do not create those whose work was used. This will simply stop people from sharing their work as it strips people's livelihoods.
