Email: [REDACTED]

General Comment

This plan will allow for unfettered control by a single company of copyrighted materials for its own gain to generate profit without properly compensating the parties from which it has taken data from. This will give immunity to business like OpenAI from any legal challenge to their potentially illegal use of copyrighted materials including news publications, books, academic and scientific journal publications, audio-visual media, and online publications not strictly defined by these definitions.

This seems to have the additional purpose to eliminate any legal punishment to OpenAI and other companies so that a virtual monopoly on theft of copyrighted materials can be given to these companies, who can then operate with impunity.
