

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-yl2j-4x5f
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5133
Comment on FR Doc # 2025-02305

Submitter Information

Name: Emerson Shaffer
Email: [REDACTED]

General Comment

The development of AI must take into consideration all copyright laws and the rights of artist and creators who's works are used to train these models.

It is not a burden nor a hindrance to have accountable, ethical, and meaningfully sourced data for training. Paying people for their works is part of society, this is how we function.

Stealing for profit, gains, or even training AI systems is wrong. We must uplift each other with AI, otherwise when all that we have made or can do is done with AI we will own nothing and be able to create nothing.

Plus AI is terrible right now even with stolen data, more stolen data isn't going to make it good. We need to break down these large companies who stifle and kill creativity and start investing in innovative ways to develop AI.

Google, Microsoft, Apple, Meta, and all these other tech giants are what is killing our ability to thrive and develop good tech. They won't bring us to AI supremacy. Instead widespread researched and funded teams will, which is why Deepseek beat us to it, they're not money hungry siphons on society.
