

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-yldn-xq6u
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5140

Comment on FR Doc # 2025-02305

Submitter Information

Name: Lars van Kluyve

Address: United States,

Email: [REDACTED]

General Comment

AI is trained on stolen data. Be it Meta training Llama on 82 TB on pirated books or OpenAI training on stolen private data, theft was an inherent part of the development. Inherent however does not mean necessary: they could have remunerated every author and artist and respected their wishes for how their art should have been used. Likewise, properly obtaining the data should have been prioritized. The failure to do so means that the current models are built on theft that imitates and endangers artists and writers while lowering the quality of writing tremendously.

For this alone, these companies deserve prosecution, as laws should apply equally.

China has proved with deepseek that the hyperscaling and larger data solution was not necessary. Continuing on this path will not develop AI further. More data does not equal better models, we need cheaper, more efficient architecture. The current firms are trying to avoid responsibility while they doing their best to avoid legal consequences for their selfish actions. AI as it is is an unprofitable bubble that generates no profit and is propped up by investment. Putting challenges in front of these AI developers will lead to better, smarter and more efficient outcomes. Rewriting copyright will let bad actors get away with inefficient practices only to be upstaged by China again.

These LLMs are not even proper intelligence, they just reproduce human language via statistics and machine learning.

Do NOT give these companies more little gifts they will not properly use and have them take some responsibility.
