General Comment

Please allow copyright protections to extend to AI training. I am an artist and my work is being used to train AI. I would like to have protection against this, but current copyright laws are unclear on this matter. This makes it impossible to know what I can legally do in this situation. A copyright model which requires copyright holders to consent in order for their data to be used, before an AI could be trained on it, would help to legally establish protections for myself, and other artists, from AI currently, and in the future.
