General Comment

In the last few years AI has been used by mega-corporations with little regard to american copyright law, training on copyrighted works of company's and authors alike.

I do not believe AI holds a place in the future of the US

AI steals from my livelihood as an American artist and profits off of theft

AI is overhyped and is fleecing the eyes of the American public.

As an american illustrator I have seen first hand what it has done to the entertainment industry and to its workers.

Please go against this, I and every illustrator does not want this, we are american workers who want no part of this AI change.
