General Comment

Hello there,

I'm a firm believer that AI holds no singular place in the future of the United States. It should not be used in anything which replaces the human creativity process or within almost all services that humans perform. AI steals from those I deeply appreciate within the art scene and steals from their livelihood. These are not simple opinions or observations, it is a hard fact which these machines rely on to create their own rubbish 'art'. AI is also both overhyped with its usage and is overall fleecing in the eyes of many within the American public. This is a terrible move to use even more AI.
