General Comment

I do not believe AI holds a place in the future of the US
AI steals from my livelihood as an American and profits off of theft
AI is overhyped and is fleecing the eyes of the American public.

AI isn't really artificial intelligence but a False equivalent,
If you want to destroy the rich human culture and history Ai would be the path to that,
It has overtly nefarious purposes.

and AI has the extreme potential to be used in ways to hurt the billionaire class beyond belief, If you want to cause damage to the status quo by allowing AI to harm billionaires, I think you will be short sighted. The wealthy elite will not be happy about this.
