General Comment

As a creative American whose livelihood depends on my work, allowing AI companies to train on copyrighted material is a direct threat to my way of life. How am I supposed to make a living off of my writing, artwork, or video production skills I have spent years honing if my work can just be stolen and fed into a machine that produces copies of my intellectual property? AI generated art and text is already taking jobs away from hardworking creative Americans and further sanitizing our culture with hollow imitations of human expression. Allowing OpenAI to freely train on copyrighted materials would only accelerate the decline of our distinct American culture and push us towards a future of homogenized slop. Thank you for listening.
