General Comment

Allowing AI companies to have unlimited access to copyright material would hurt all American artists from independents to multi-billion dollar companies by stealing from everyone. Mircosofi is already pulling back from leasing as many data centers as hype is dying down and public opinion is waning. Generative AI may have more niche uses in certain STEM fields, but at the end of the day it's far cheaper, yields a better product, and is better for the economy to just hire more American artists.
