

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-yq14-4idb
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5229

Comment on FR Doc # 2025-02305

Submitter Information

Name: Trevor Little

[REDACTED]

General Comment

Words cannot express how dangerous it is to allow AI models to train unrestrained and unregulated — AI already has a public reputation for being inefficient, inaccurate, and an overall untrustworthy and unwanted sector of tech “innovation” that disrupts not only people’s livelihoods, but also our limited natural resources and assets. I can assure you that not only will this push to deregulate AI result in a degradation of the entertainment industry that serves as such a cornerstone of the American economy and cultural output (both domestic and abroad), but will also establish a dangerous precedent in the country encouraging an overreliance on AI — one only needs to study how ChatGPT has damaged our schools and student populations already to understand where this kind of technology will lead us culturally and intellectually. For the good of our country and those who call it home, don’t let AI run rampant. There are better ways to maintain national security than handing it to private AI barons.
